PROFESSIONAL PROFILE

Attorney, legal educator and Doctor of Law and Economics specializing in the intersection of artificial intelligence, law and economics. Over 20 years of legal practice combined with extensive academic and professional teaching: develops and delivers university courses, professional seminars and conference keynotes on AI and law, legal technology, dispute resolution and the future of the legal profession. Bridges rigorous legal theory with field practice, translating emerging AI tools into practical methods for lawyers, students and decision-makers. Founder of the LALUM Legal Clinic and originator of the Decision-Oriented Mediation (DOM) framework.

AREAS OF EXPERTISE

- **AI & Law:** Artificial intelligence in legal practice and education, explainable AI, algorithmic decision-making, LegalTech and smart contracting.
- **Legal Education & Lecturing:** University teaching, professional training, curriculum design, conference keynotes and expert workshops.
- **Law & Economics:** Economic analysis of law, regulation, risk modeling and decision-making frameworks.
- **General Legal Practice:** Civil and commercial law, contracts, professional ethics and comparative law.
- **Dispute Resolution:** Mediation, arbitration and expert opinions; developer of the Decision-Oriented Mediation (DOM) method.
